

LPS COMBI SHRINK WRAPPING SYSTEM

Improves presentation and protects your products

What Does It Do?

The LPS Combi shrink wrapping system is an L-sealing machine and shrink tunnel in one. It helps to protect products whilst still presenting them in clear, appealing way. The shrink film also protects the products from water damage and strengthens the overall protection of products. The L-sealing system and shrink tunnel in one is also available in a stainless steel version for food and pharmaceutical uses.

How Does It Work?

The Combi is new range of semi-automatic modular angular wrapping machines, presenting a monoblock structure that distinguishes it from others. Specifically, the retracting tunnel -equipped with a speed, height and temperature adjustment system- is fully integrated within the welding unit, making the structure of the packaging machine versatile and compact.

The compact and versatile shrink tunnel includes a temperature, height and speed adjustment control and is suitable for medium sized mass production. The motor-driven transport belt, equipped with adjustable pitch and height, enables products to run automatically through the tunnel.

Sealing time can be electronically set up and the motor-driven patented sealing bar includes teflon-coated blades for additional safety. A safety system continuous cycle cooling systems and motorised winder system are standard in this machine.

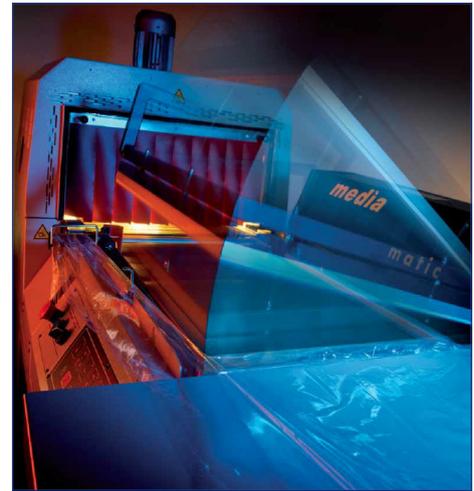

The LPS Combi works with polythene, PVC, polyolefin and polypropylene.

Key Features:

- **Cooling system at closed circuit and patented sealing bar safety system**
- **Temperature adjustable by electronic thermoregulator**
- **Heat insulated structure**
- **Teflon coated sealing bars with closed circuit cooling system**
- **Patented safety system**

SPECIFICATIONS

Speed	Up to 900 products per hour – Speeds are dependant upon applications and operators.
Maximum Power	5.6kw
Effective sealing bar dimensions	540mm x 400mm
Max product dimensions	500x380x200
Power Supply	200/208/220/380/415 (3 phase)
Max Film Roll Dimensions	Max 350mm x 600mm
Working plate height	875mm
Machine Weight	287/343kg
Machine Dimensions with Open Hood	2780mm x 730mm x 1380mm (motor)
Machine Dimensions with Closed Hood	2780mm x 730mm x 1380mm (motor)
Packed machine dimensions	2500mm x 900mm x 1510mm
Machine weight (Net/Gross)	287kg/343kg

OPTIONS

Stainless steel sealing plate
Blower
Film separator sheet
Stainless steel 0.5mt roller conveyor
1mt roller conveyor
Teflon tunnel belt
Sealing belt for foodstuffs

Why Choose An LPS Shrink Wrapping System?

Liberty Packaging Systems is one of the UK's leading suppliers of mailroom equipment. As well as having a dedicated team of knowledgeable experts to offer advice and bespoke solutions to suit your mailing needs, we have a well-trained customer support team and highly skilled team of field engineers to support you after your purchase.

This reliable and efficient after-care support service is provided to ensure you get the most out of your purchase. We also offer a comprehensive range of technical support and service packages that cover both equipment and software. Our maintenance packages are an economical way to maximise performance and the longevity of your machine, overall resulting in peace of mind.
