

LPS L5000 SHRINK WRAPPING SYSTEM

Maximum Flexibility, Minimum Effort

What Does It Do?

The LPS L5000 offers maximum packaging **FLEXIBILITY** and a **QUALITY** product at a competitive price. It uses an electronically controlled sealing system and the very latest safety devices, which includes an emergency off switch and a bar opening delay allows the sealer to cool down. It can be used in automatic or semi-automatic mode. The operating programmes can be customised in order to **SIMPLIFY** the packaging process and **MAXIMISE PRODUCTIVITY**. The system can be used with the LPS Tunnel 50.

Machine Specifications

Power Supply	200/208/220/380/415 V	3ph
Max Output	0-900p/h	
Max Roll Film Dimensions	Diameter 250mm Width 600mm	
Working Plate Height	930mm	
Packed Machine Dimensions	1520mm x 1080mm x 850	
Machine Weight (net/gross)	151/182kg	

Key Features

Digital Panel with 6 Programmes

Teflon Coated Sealing Blade

Double Sealing Bar with Shock Absorber

Continuous Cycle Cooling System

Adjustable Working Plate

Motor Driven Conveyor Belt with Adjustable Speed

Integrated Roll Support
