

LPS VC SAVEVAC

Improves The Security & Presentation of Your Products

What Does It Do?

The VC Savevac is a **HANDY, COMPACT & RESISTANT** vacuum packaging machine. The new range of the LPS SV professional packaging machines are available in **THREE** different models, each with different sealing bar dimensions.

All 3 models are extremely sturdy, as they are made entirely from stainless steel. They are user friendly resulting in an **EASY TO OPERATE** machine with a fully automatic cycle. With their compact design, they are practical and yet also high performance machines, thanks to their powerful self-lubricating pump. These machines are perfect for use in the catering and domestic industries.
