

VC 31XP VACUUM SEALER

VC 31XP: the chamber vacuum sealer with vacuum tracking

What Does It Do?

Part of the new series of chamber vacuum packaging machines, the VC 31XP vacuum sealer comes with an option to print labels for each item being sealed, useful for expiry dates and tracking.

Another innovative feature is the control panel, a true flagship that encompasses some pioneering technologies in the food packaging sector. Thanks to its high degree of interactivity and the simplicity of navigation between functions, the panel allows a quick setting of operations.

- Check-Up Function displays error messages without the need to open the machine.
- Product type selection per main category (meat, fish, cheese, vegetables...).
- Select sub-categories (e.g. meat: veal, beef, poultry, pork...) for each product main categories.
- Automatic packaging cycle activation with suggested or default values after the selection of sub-categories; if needed, on this mode, one can program a product expiration date.
- EASY PULSE function for simple programming which gives the advantage for the operator to select pre-set stored functions with pre-set parameters.
- Programmable printing option to print the vacuum certification label and to choose the number of copies to stick on every single package obtained during each cycle.
- Electronic SOFT AIR with several speed levels, for the gradual return of the air in the chamber which avoids any sudden package collapse (ideal for products with rough-edged parts).
- CP-CONDITIONING PROGRAM function to start the pump; it allows for the liquid-oil emulsions elimination which may deposit in the pump tank. It is recommended after long periods of a machine's inactivity.
- EXTERNAL VACUUM option to create the vacuum inside a container which is located outside the machine but connected with it through a tube that goes to the machine's chamber.
- Ability to carry out the vacuum process by setting the timer, eliminating the need to read the vacuum sensor.
- Error message or indication of mechanical failure and displays the nearest assistance centre telephone number and / or e-mail address.
- The oil change can be done without moving the pump.
- Access to the power board from the side of the machine without the need to lift the chamber. □ CE/ETL/NSF certified.

SPECIFICATIONS

Power Supply	120/230 (3 phase)
Phase ph	1
Sealing Bar	310mm
Pack cycle (Vac 99.9%) sec	Vac = 22 - Air = 4
Vacuum pump mc/h	8
Machine dimensions with the lid open mm	390mm x 499mm x (h) 669mm
Machine dimensions with the lid closed mm	390mm x 499mm x (h) 6345mm
Availible chamber dimensions (Tank & lid)mm	325x243.5 x h158
Machine weight	37/41kg

Label Information Example

Date	2010-05-08
Time	10.15
Vacuum	99.9%
Gas	20% CO2
Type	Beef
Operator	0004
Company	AMS Butchers
Expiry date	2010-06-08 (optional)

Why Choose An LPS System?

Liberty Packaging Systems is one of the UK's leading suppliers of mailroom equipment. As well as having a dedicated team of knowledgeable experts to offer advice and bespoke solutions to suit your mailing needs, we have a well-trained customer support team and highly skilled team of field engineers to support you after your purchase.

This reliable and efficient after-care support service is provided to ensure you get the most out of your purchase. We also offer a comprehensive range of technical support and service packages that cover both equipment and software. Our maintenance packages are an economical way to maximise performance and the longevity of your machine, overall resulting in peace of mind.
